

### 3+3 Folding Hardware Specification Sheet

| NO. | Hardware Names                  | Item No.       | Photo                                                                               | Usage Instruction                          | QTY | Screws               | Screws qty | Installation position                                             |
|-----|---------------------------------|----------------|-------------------------------------------------------------------------------------|--------------------------------------------|-----|----------------------|------------|-------------------------------------------------------------------|
| 1   | Lead panel top hinge            | E3CPSS top     |    | Used with bottom hinge, no size limitation | 2   | M5 countersunk screw | 8          | Door Panel 1-1/Door Panel 6-2                                     |
| 2   | Lead panel bottom hinge         | E3CPSS bottom  |    |                                            |     | M5 countersunk screw | 8          |                                                                   |
| 3   | Lead panel middle hinge         | E3WPSS         |    | 1.5 m – 2.25 m                             | 2   | M5 countersunk screw | 8          |                                                                   |
| 4   |                                 |                |                                                                                     | 2.25 m – 2.743 m                           | 4   | M5 countersunk screw | 16         |                                                                   |
| 5   | Offset hinge                    | E3HHSS top     |    | Used with bottom hinge, no size limitation | 2   | M5 countersunk screw | 14         | Between Panel 1-2 and Panel 2-1 / Between Panel 5-2 and Panel 6-1 |
| 6   | Offset hinge                    | E3HHSS bottom  |                                                                                     |                                            |     | M5 countersunk screw | 14         |                                                                   |
| 7   | Offset hinge with handle        | E3HHSS中        |   | Above 1.5 m                                | 2   | M5 countersunk screw | 14         |                                                                   |
| 8   | Offset hinge                    | E3HHNHS        |  | 2.25 m – 2.743 m                           | 2   | M5 countersunk screw | 14         |                                                                   |
| 9   | Center hinge with hanger roller | E3CICSS top    |  | Used with bottom hinge, no size limitation | 2   | M5 countersunk screw | 13         | Between Panel 2-2 and Panel 3-1 / Between Panel 4-2 and Panel 6-1 |
| 10  | Center hinge with bottom roller | E3CICSS bottom |  |                                            |     | M5 countersunk screw | 14         |                                                                   |
| 11  | Center hinge                    | E3CICSS middle |  | Above 1.5 m                                | 2   | M5 countersunk screw | 14         |                                                                   |
| 12  | Center hinge                    | E3HNHS         |  | 2.25 m – 2.743 m                           | 2   | M5 countersunk screw | 14         |                                                                   |
